NURSERIES
Dansville, New York

1929

HOW TO ORDER

Buy from the Reliable Grower and Save Disappointment at Fruiting Time

In presenting this 30th edition of our catalog, we wish to extend thanks for your past patronage and assure you and all customers of the same High Quality of stock and personal service as in the past.

Order Early as our orders are shipped in the rotation they are received—first come, first served. If you want your order shipped on a certain date, mark it so on the order and we will get it off as nearly at that time as possible. Our regular shipping season begins about March 20th in spring and October 15th in fall.

Packing Free. We make no charge for boxing, packing, or delivering to freight station or express office. All orders are put up in boxes or bales, lined with heavy paper to guard against drying out. The trees and plants are packed in moist excelsior and straw.

Prices. Our prices are f. o. b. Dansville, purchaser paying the transportation charges on arrival.

Discount. We allow a discount of 10% on all orders for which cash is received before April 5th. After that date 5%.

References. Our satisfied customers are our best recommendations. See a few of their letters in this catalog. We would also refer you to the Citizens Bank and Merchants & Farmers Bank, both of Dansville, Dun's or Bradstreet's Commercial Agencies.

Terms. Cash before shipment. If you wish to buy on other terms, state them, giving reference and responsibility. You need not, however, send full amount with your order, send one-fourth and the balance when shipment is wanted.

Remittance should be made by Bank Draft, Express Money Order, Post Office Money Order, Registered Letter or your own personal check.

In ordering use the enclosed order blank and give full shipping directions. If Post Office address is different from railroad station, be sure to give both.

Agents' and Dealers' orders billed out and tagged for delivery to customers without additional charge.

C. O. D. Orders. We ship trees and plants C. O. D., providing 25% of the total amount is sent with order. If the order goes by express you pay the balance to your express agent on arrival. If shipped by freight you pay the balance at your bank, where you will also find Bill of Lading, which you present to freight agent, who will deliver shipment to you.

WE GUARANTEE ALL STOCK TO BE

First-class in every respect

Up to Size and Grade paid for

Free from dangerous Insects and Disease

To reach destination in good condition.

Secure Varieties Now—Pay at Shipping Time

If you want to secure certain varieties of trees and have not the ready cash to pay for the same, send us your order accompanied by a small remittance, just enough to show us you mean business, say one-fourth of the amount of your order, and we will book your orders and hold them for you until such time as you may want them shipped, when you can remit the balance. Orders placed with us early have the privilege of being shipped early if desired.

Our Guarantee is as Follows:

To deliver all stock at destination in first-class condition, also to be true to name and free from disease. Should any arrive otherwise we must be notified within five days after arrival and we will make proper adjustment.

When Ordering Keep in Mind

10% Discount

On Cash Orders Received Before

April 5th

No. 1526

STATE OF NEW YORK
DEPARTMENT OF AGRICULTURE
AND MARKETS

BERNE A. PYRKE, Commissioner

CERTIFICATE OF INSPECTION OF
NURSERY STOCK

This is to certify that the nursery stock of The William J. Reilly Nurseries of Dansville, County of Livingston, State of New York, has been duly examined in compliance with the Agriculture and Markets Law and has been found to be apparently free from all injurious insects and plant diseases. This certificate is valid until September 1, 1929.

Dated, Albany, N. Y., Sept. 1, 1928.

BERNE A. PYRKE, Commissioner.

B. D. Van Buren, Director, Bureau Plant Industry.

Directions for Transplanting

Care of Stock on Arrival. All stock should be planted immediately on arrival, but if not convenient to do so, open bundle and heel roots in the ground, covering them thoroughly.

Preparation of Soil and Stock. Prepare a rich, deep bed of mellow soil and have the land sufficiently drained to relieve the roots from standing water. To insure a fine growth, land should be in as good condition as is required for a crop of wheat, corn or potatoes. We use great care in digging and packing, but the loss of some small roots and fibers is unavoidable. If the stock is properly prepared before it is planted, no permanent injury will result from this, but to preserve the natural balance between the top and root, the former should be cut back to about one-half of the previous year's growth. Prune off all bruised or broken roots; a smooth cut will callous sooner than a broken end. Peach trees should have all the side branches trimmed off before planting. Evergreens and other ornamentals, the beauty of which depends upon preserving their natural form, should be trimmed very little, if any. If not ready to plant when the trees arrive, put them in a trench, covering the roots well with mellow earth and packing it down.

Planting. Make the holes large enough to admit the roots without cramping or bending and set one inch deeper than they stood in the nursery row. Fine surface soil should be used for covering the roots, and this should be carefully worked among them. If the ground is dry, it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots, so that there will be no opportunity for dry air or frost to enter and destroy roots deprived of the full benefit of their natural protection. **Omission to pack solidly is the most frequent cause of failure in planting nursery stock.** Fill the holes full enough to be even with the surrounding surface after the fresh earth settles. Always remove the labels when planting. If these are left until the trees are grown, the connecting wire often cuts into and destroys the tree or branch to which it is attached. Never use manure in contact with roots. When planting dwarf trees, set them low enough to cover the stock upon which they are budded. Large standard trees should be staked and tied, so that the wind will not loosen the roots. This should be done so that the bands will not chafe the trees. A very good plan is to drive two stakes and confine the trees between straw or hay bands, stretched from stake to stake. It is not necessary to stake medium-sized trees that have been properly cut back when transplanted.

Mulching. When trees or bushes are planted, they should be mulched or covered with a layer of coarse manure or litter from 3 to 6 inches deep, over a space two feet wider than the extent of the roots. This keeps the earth moist and of even temperature.

After Planting. Grass should not be allowed to grow about young trees or plants. The ground should be cultivated for a space of at least one foot beyond the roots. If the ground is poor it should be enriched with a surface application of manure. Pruning should be varied according to the condition of the tree and the purpose of the planter. It should be done regularly every spring, before the buds swell. In this way the removal of larger branches will be avoided.

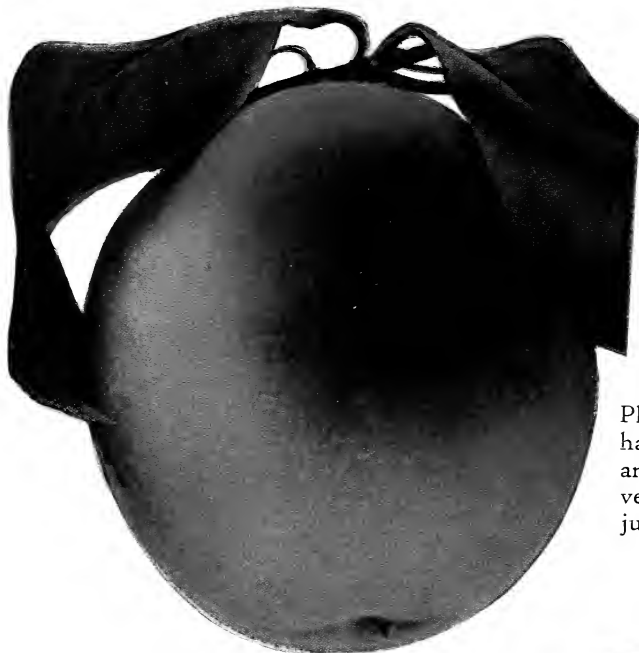

Injured Trees. If trees are received in a frozen state, place the package, unopened, in a cellar away from frost and heat, until thawed out, and then unpack. If partially dried from long exposure, bury entirely in the ground, or place in water from twelve to twenty-four hours. There is a popular belief that trees are in great danger if more than a week or two in transit. Now, if the trees are properly ripened and properly packed, they will carry safely for several months in moderately cool weather. We have had seedlings sent from France that were three months in the boxes and came out in perfect condition. This knowledge may afford some relief to the over-anxiety of inexperienced buyers.

Trimming Shrubby. Newly planted shrubby should be cut back severely; from one-third to one-half of the top should be removed. If the planting is done in the fall it is usually best to defer this trimming until early the following spring.

Shrubs that bloom before the middle of June should be trimmed just after the blooming period to ensure a profusion of bloom the following year. Shrubs like Altheas and Hydrangeas which bloom later, should be pruned in the winter. Fading flowers and forming seed vessels should, where practicable, be removed, that the strength which otherwise would go into ripening seeds may be diverted to forming flower buds for the ensuing year. In trimming shrubs avoid stiff, unnatural results and cut so the plant will bear long, graceful branches.

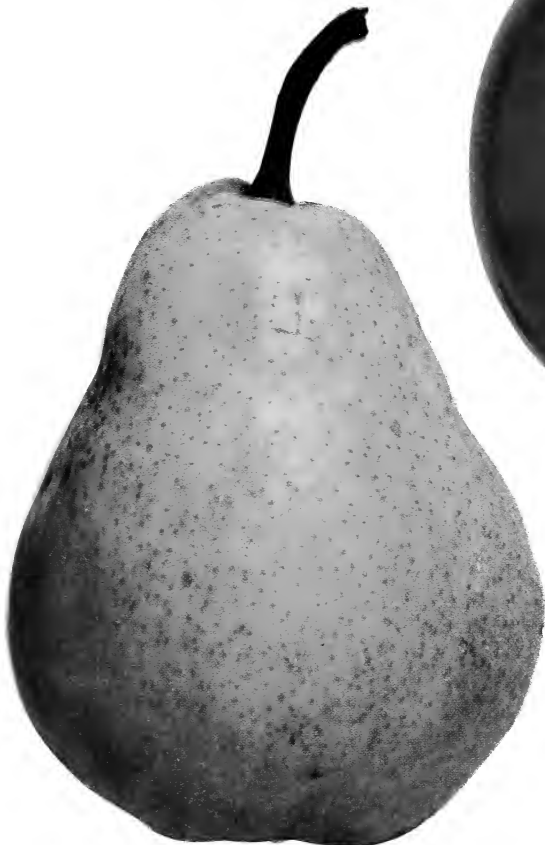

Winter Protection. Most of us have some varieties which are a little delicate or which have so recently been transplanted that some winter protection is necessary. A mulch of manure about one inch deep, spread about such plants after the ground becomes frozen, prevents the alternate freezing and thawing which is disastrous. Leaves are valuable for mulching, especially for the perennial beds. They may be confined by branches or wire netting.

10% Discount On All Orders Received Before April 5th. After That Date 5%.

ELBERTA PEACH

The best peach of its season; of great commercial value for its splendid shipping qualities. The fruit is rich yellow with red cheek, juicy and highly flavored. Very hardy.

BARTLETT PEAR

Hardy, productive and an excellent shipper. The season's best eating and canning pear.

Fruiting Age Trees

Plant Reilly's big, healthy, weather-hardened fruit trees, heavily rooted and beautifully branched. Well developed and ready to yield full sized, juicy fruit in the quickest possible time.

McINTOSH APPLE

Medium large; smooth; yellow, covered with brilliant crimson; flesh snowy white, very tender and aromatic. Trees are vigorous and a good annual bearer.

We recommend this collection of 6 varieties of fruiting age trees for your home garden.

Take advantage of this Special Offer.

Plant Big Trees For Early Results

ORANGE QUINCE

Fruit large, bright yellow, of excellent flavor. A vigorous grower and an immense producer.

MONTMORENCY CHERRY
A National Favorite

LOMBARD PLUM

Medium large; dark violet red; flesh yellow, juicy and pleasant flavor; popular, hardy, valuable commercially.

Special Offer

6 Big, Extra Fine Fruiting Age Trees **\$7.00**

4 to 5-Year-old, Heavily Rooted

1 McIntosh Apple	1 Lombard Plum

1 Elberta Peach	1 Orange Quince

SIX YEAR COLLECTION

6 All Extra Selected **\$12.00**

6 Year Size

1 McIntosh Apple	1 Lombard Plum
1 Bartlett Pear	1 Montmorency Cherry
1 Elberta Peach	1 Orange Quince

Fruiting Age Trees

IT has been the custom and is now with most nurserymen to dig and sell to the planter fruit trees at one and two years of age, requiring the planter to develop them in the orchard to Fruiting Age size. When you take into consideration that you plant from 30 to 80 trees on an acre, it is expensive to develop the young stock in the orchard as compared with producing 8,000 to 10,000 trees in the nursery on one acre of ground.

There is no doubt but that the nurserymen of experience can train and develop these trees and bring them to Fruiting Age size in the nursery much better and cheaper than the planter.

Fruiting Age trees properly grown to insure successful transplanting and thrifty after-growth should be root-pruned or transplanted at two years of age. Root pruning is done by cutting under with the digger and allowing the trees to remain in the original row until 4 or 5 years of age. This acts the same as transplanting, forming fibrous roots, retarding the growth, hardening up the wood, and forming fruit spurs.

During the past twelve years we have grown our Fruiting Age trees in the above manner and find that they live and grow after shipment as well as younger stock on this account.

We know of no other firm listing and selling root-pruned Fruiting Age trees, and would caution you in buying this grade of stock from nurserymen inexperienced in this separate and distinct branch. It costs more to produce, but is worth more to plant Root-Pruned FRUITING AGE TREES.

Fruiting Age trees require very little trimming. Round in the top, and prune the roots so that they will go into a hole about 18 inches deep, and 18 inches across. Plant these about 3 to 4 inches deeper than they stood in the nursery row, and pack the soil well around the roots. Do this two or three times, while filling the hole. If requested on your order, we will trim the Fruiting Age trees for planting without charge.

Some of these early-bearing varieties have already borne fruit in the nursery row, and should bear some fruit the year after planting. If they blossom the year of planting, the blossoms should be taken off, for the tree should have this nourishment for wood growth.

These extra fine specimen trees are developed in the nursery row by men of long experience, kept free from disease and insect pests and brought to fruiting age in a more vigorous condition than you can develop young trees in your own orchard.

The William J. Reilly Nurseries,
Dansville, N. Y.

Stelton, N. J.

Gentlemen:

Kindly send me your catalog. Some years ago I bought trees, etc., from you. My neighbors laughed at my "Fruiting Age" trees. They soon stopped laughing; I had fruit, but they are still waiting and hoping.

You have that which appeals to everyone's desire for results, "Fruiting Age" trees.

Man is a selfish and acquisitive animal who takes his span of life into consideration and is not very enthusiastic of raising orchards for posterity. He wants results—soon.

Yours truly,

A. B. HERSCHMANN.

Fruiting Age Trees

We Recommend These to the Planter and Know That They Will Give Perfect Satisfaction

STANDARD APPLES

Fruiting Age	4-5 Years	1 to 1½ Inch	Each
			\$1.25

Varieties: Baldwin, Duchess, Wealthy, Red Astrachan, Yellow Transparent, Banana, Rome Beauty, Stayman's, Northern Spy, Gano, Stark, Talman Sweet, Grimes' Golden, N. W. Greening, R. I. Greening, McIntosh, Rambo, Golden Russet, Pound Sweet, Sweet Bough, Transcendent Crab, Hyslop Crab, Cortland.

STANDARD PEARS

Fruiting Age	4-5 Years	1 to 1½ Inch	Each
			\$1.25

Varieties: Bartlett, Clapp's Favorite, Anjou, Duchess, Seckel, Flemish, Kieffer, Bosc, Sheldon.

CHERRIES

Fruiting Age	4-5 Years	1 to 1½ Inch	Each
			\$1.25

Varieties: Early Richmond, Morello, Montmorency, Black Tartarian, Napoleon, Gov. Wood, Windsor, Schmidt's, May Duke.

PLUMS

Fruiting Age	4-5 Years	1 to 1½ Inch	Each
			\$1.25

Varieties: Abundance, Burbank, Red June, Lombard, York State Prune, Shrop. Damson, Bradshaw, Reine Claude, Imperial Gage.

PEACHES

Fruiting Age	2-3 Years	¾ to 1 Inch	Each
			\$1.25

Varieties: Elberta, Early Crawford, Late Crawford, Champion, Hale, Rochester.

DWARF PEARS

Fruiting Age	4-5 Years	¾ to 1 Inch	Each
			\$1.25

Varieties: Duchess, Anjou, Bartlett.

DWARF APPLES

Fruiting Age	4-5 Years	¾ to 1 Inch	Each
			\$1.25

Varieties: Delicious, McIntosh, Duchess, Yellow Transparent, Red Astrachan, Baldwin, Wealthy.

QUINCE TREES

Fruiting Age, 4-5 Yrs., 5 to 6 ft.	Each
	\$1.25

Varieties: Orange, Champion.

APRICOT TREES

Fruiting Age, 4-5 Yrs., 5 to 6 ft.	Each
	\$1.50

Varieties: Harris, Moorpark, Alexander.

GRAPE VINES

Fruiting Age, 3-4 Years	Each
	\$0.50

Varieties: Concord, Campbell's Early, Brighton, Catawba, Niagara.

CURRENT BUSHES

Fruiting Age, 3-4 Yrs.	Each
	\$0.70

Varieties: Cherry, Perfection, Fay's Prolific, Red Cross, White Grape.

Fruiting Age, 3 Year Plants	Each	10
	\$0.25	\$2.25

Extra Selected Six-Year Stock

We can supply some Extra Selected 6 Year Old Large Size Trees at \$2.50 each.

Same varieties as the fruiting age.

Apples

THE apple rightfully commands first place among our orchard fruits. Unlike other fruits, its season of ripening is such that we can have apples nearly the year around. The following list of varieties are grown in our own nurseries and offered to the planter at cost of production, with one profit added — "The Grower's."

NORTHERN SPY

SUMMER VARIETIES

Early McIntosh A new seedling originated at the N. Y. State Experiment Station, Geneva, N.Y. A seedling of McIntosh and Yellow Transparent. A fine new red summer apple.

Red Astrachan Very early. Medium size; yellow and red; flesh decidedly acid and juicy; it is an excellent cooking apple. Tree very hardy and a good bearer. It is a good commercial apple for local market on account of being very early.

SUMMER VARIETIES

Sweet Bough Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer. August.

Yellow Transparent Medium size, roundish, slightly conical; skin pale yellow when fully matured; flesh tender, juicy, sprightly, sub-acid; good. August.

BALDWIN

APPLES—Continued

AUTUMN VARIETIES

Fall Pippin Large size; yellow; flesh tender, rich and delicious. Valuable for culinary use and for market. The tree is a strong grower.

Fameuse (Snow) One of the finest dessert apples; medium size; deep crimson color; flesh is snow white, tender, melting and delicious flavor. It is a valuable market variety in the Northern apple growing districts. Tree a moderate grower; hardy, healthy and productive. October to January.

Gravenstein An excellent apple of large size, attractive appearance and excellent quality; one of the best of its season for home use and for market. Fruit red striped with yellow; crisp, juicy and fine flavored; always commanding a high price in the markets.

Oldenburg (Duchess of) Medium to large size; striped red and yellow; flesh white, juicy, of excellent flavor and fine quality. Tree hardy; of Russian origin and will stand the most severe winters; dwarfish grower; makes fine filler. This variety will thrive anywhere that apples can be grown. Good commercial variety.

Rambo Medium size, red and yellow; mild flavor. Tree a strong and vigorous grower and good bearer.

Wealthy Late fall variety. Almost solid red color; flesh white; pleasant sub-acid, fine grained and very good. It is one of the most profitable market varieties and always brings good prices. Tree very hardy and a vigorous, upright grower. This variety is valuable for cold climates on account of its hardiness, but succeeds in all of the apple districts.

WINTER VARIETIES

Baldwin The standard market variety in the section from New England to Michigan and Virginia on the South. Fruit large, round, red all over; rich, sub-acid flavor. It stands handling on account of its firm texture and thick skin. Tree a strong grower, long lived and vigorous. Enormously productive.

WEALTHY

DELICIOUS

Banana Large to extra large; golden yellow with beautiful pinkish blush; a fancy apple of choice dessert quality. Has a suggestive banana flavor. Every home orchard should have a few of this variety. Tree is a very strong grower and comes into bearing young.

Cortland New variety originated by the New York State Agricultural Experimental Station. A beautiful and high quality apple resulting from the cross pollinization of Ben Davis and McIntosh. Inherits the good qualities of each, and has its own good qualities, making it a strong competitor of the Baldwin in popularity. The Cortland is larger than the McIntosh; a better quality and matures two or three weeks earlier. Keeps late in the winter; a good shipper and undoubtedly a real leader.

Delicious No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting, juicy with a delightful aroma, of very highest quality. A splendid keeper and shipper. Tree one of the hardiest. November to April.

Golden Russet (Bullock). Dull russet; flesh greenish, crisp, high flavored. Keeps until spring. Tree very hardy.

Grimes' Golden Medium size, golden yellow; tender, rich, sub-acid flavor. It is an early winter apple but keeps until February without losing any of its crispness or rich flavor.

Jonathan Medium size; brilliant red; very highly flavored, juicy, fine grained, tender, sub-acid. An early bearer. November to January.

King Uniform large size; beautiful red and yellow; excellent in quality for dessert; crisp and juicy. October to January.

McIntosh Red Early winter variety. This is the leading apple in demand and price in all the early winter markets. It is adapted to a wide range of territory, and does particularly well in all apple growing sections of the North and West. Large size; bright deep red; flesh white with pinkish tinge; juicy, with slightly acid flavor. Exceedingly attractive and the best eating apple of its season. Tree a medium grower and bears in three or four years after planting, makes fine fillers.

APPLES—Continued

CORTLAND

WINTER VARIETIES—Continued

Northern Spy Large size, fine quality and handsome appearance give it first rank for fancy trade. Bright, light red and yellow; flesh juicy, crisp, rich and tender; fine flavor. When well grown and properly packed brings the very highest prices. Trees hardy, healthy and vigorous.

Red Spy A solid bright red Spy without stripes or splashes. It has been recommended to fruit growers by the N. S. State Fruit Testing Co-operative Association at Geneva as a new variety worthy of trial.

Rhode Island Greening This variety has the distinction of being second in commercial importance in New York state, being surpassed by Baldwin only. Fruit large size, greenish yellow; flesh crisp, juicy, quite acid, of very fine flavor and quality. Ripens before Baldwin, which extends the harvesting season. Tree is long lived and a spreading, vigorous grower.

Rome Beauty Large, round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points. December to March.

Stark Fruit large size, round, greenish yellow with red stripes; flesh yellow, crisp and mild sub-acid; quality good. Stands handling well on account of its firm flesh and tough, thick skin. Long keeper and a reliable commercial sort.

Stayman's Winesap This is one of the leading commercial varieties in all apple districts. The fruit is medium to large; attractive green and yellow, almost covered with dark red stripes; flesh yellow, firm, crisp and juicy; quality fine. Tree a fast and large grower. Decidedly the best of the Winesap group.

Talman Sweet Medium in size; pale yellow, sweet. Fruit much esteemed for pickling, boiling, baking and apple sauce. Tree is hardy, long lived and a good grower.

Wagener A high class apple of beautiful bright red color; fine texture; high flavor and excellent quality. It is one of the youngest bearers we have; we often find some fruit on our two and three year trees in the nursery row, and it has a tendency to overbear in the orchard. Tree a vigorous, upright grower, and on account of its early bearing habits and high quality makes a good variety to plant as fillers among permanent trees.

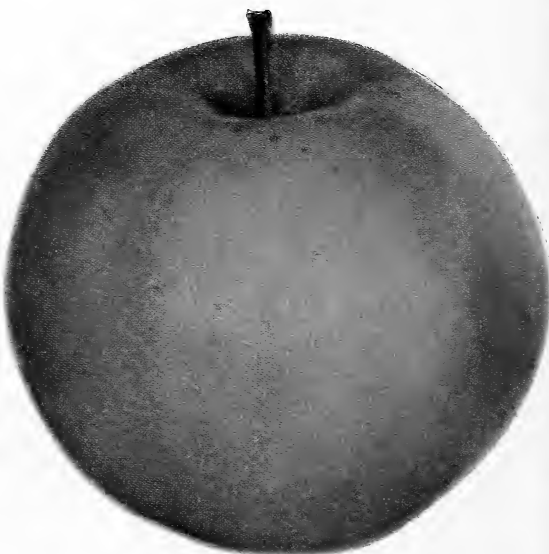

York Imperial A very popular commercial variety. Fruit greenish yellow overlaid with bright red stripes; flesh tender, firm, crisp, juicy and of good flavor.

CRAB APPLES

Hyslop Large, deep crimson; one of the most beautiful of Crabs; vigorous and hardy. October.

Transcendent Fruit very large; yellow, striped with red. Juicy, crisp and the best of the Crabs for all purposes, and a valuable sort for commercial purposes. Bears young and produces immense crops annually. September and October.

Fillers Most commercial orchards are now planted with standard varieties, 40 feet apart each way. Quick, upright growing, early maturing varieties are used as fillers, planting between standards to make 20 feet apart; fillers to be removed when standard trees require the room (12 to 18 years). This requires 28 standard and 82 fillers to the acre. We recommend for fillers:—Yellow Transparent, Duchess of Oldenburg, Grimes' Golden, McIntosh and Wagener.

RHODE ISLAND GREENING

Peaches

All Budded on Tennessee Natural Pits, Free from Insects and Disease. Perfectly Healthy, Well Ripened Wood, with Splendid Fibrous Roots

THE peach tree requires a well drained, moderately rich soil, a warm sandy loam is probably the best. In order to preserve the continued healthy growth of the tree and the fine quality of the fruit, the tree should have the shoots and branches shortened every year, so as to produce a round, vigorous head with plenty of young wood. In trimming it should be borne in mind that the fruit is produced on the previous year's growth of wood; every spring the trees should be gone over and the new wood cut back about one-half, this will keep the tree well supplied with vigorous fruit buds and bearing wood. Clean culture, annual pruning and frequent examination for borers are the requirements of the peach.

		Height	Caliper		Each	Ten	Hundred
Largest Size	1 Year	4 1/2 to 6 feet	9-16 & up	XXX	\$0.50	\$4.00	\$25.00

RATES: 1 to 5 of a kind at each rate; 5 to 50 at 10 rate; 50 and over at 100 rate.

10% Discount on all Cash Orders mailed before April 5th.

Belle of Georgia Fruit large size; color red and white; flesh white, firm and highly flavored. This variety has become one of the standard varieties in the big commercial orchards, both North and South. Stands shipping well and brings top prices. In many respects it is equal to Elberta. Tree a rapid grower and very productive. Perfect freestone. September 10th.

Carman A valuable commercial variety ripening before Belle of Georgia; creamy white with deep blush; skin tough; flesh white; freestone; fruit stands shipping well and reaches market in prime condition, and its handsome appearance causes it to bring highest prices. Tree is a vigorous grower and very hardy, even under unfavorable conditions; bears well every year. September 1st.

Chair's Choice Has no superior in quality and flavor and for profit is without a rival; large, yellow, free, rich in color, flesh very firm, ripens after Smock; great bearer. October. Freestone.

Champion Large size; creamy white with a beautiful red cheek; flesh white; fine flavor, sweet, rich, juicy, freestone. It is a good shipper and sells for a high price. The tree is hardy and productive, and it is a valuable variety for either home or commercial planting. August 25th.

Crawford Early One of the standard early yellow peaches for commercial orchards and home use. Not as hardy in wood or bud as some of the early white sorts, but its high quality and fine flavor make it a favorite. Freestone. August 20th.

Crawford Late One of the very best late sorts, and a very important commercial variety. Very large size; splendid yellow with broad red cheek; flesh yellow, juicy and melting; high quality and rich flavor; freestone. Comes at a time when it is eagerly sought for canning and preserving, and brings the highest prices. It is considered by many to be the best of all late peaches, and being such a remarkable shipper it reaches market in prime condition. Tree a vigorous grower and a dependable producer of good crops of fruit almost every year. September 20th.

Elberta The leading market variety in all peach growing sections; it seems to thrive wherever peaches can be grown; it is safe to say that one-third of all peaches planted are Elberta. Fruit large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich and sweet. Tree vigorous, hardy, and thrives in the entire peach growing section. For years Elberta has been the standard market peach in both Northern and Southern markets. No other peach has ever been introduced that fills all the requirements of a commercial peach like Elberta. Freestone. September 15-20th.

Fitzgerald Large size; golden yellow with red cheek; flesh yellow tinted with red at the pit; juicy and of good quality. Tree medium grower and very productive; bears young. Originated in Canada and is one of the hardiest peaches in both wood and bud. Profitable for market and should be planted where hardy varieties are necessary. Freestone. September 5th.

Greensboro Many commercial growers consider this to be the best of the early peaches. Being somewhat tender it requires care in

J. H. HALE—New Yellow

PEACHES—Continued

handling, but reaches market when peaches are in strong demand. Fruit extra large for such an early peach; very handsome, rich, yellowish white with a crimson cheek; flesh white, tender and of fine quality. Tree a strong grower and extremely hardy in both wood and bud; we recommend it for planting in cold sections where other varieties do not succeed. Semicingling. August 5th.

Hale (New Yellow) This notable new variety of peach is very large in size. In color it is a deep, golden yellow overlaid with bright carmine. The skin is thick, smooth and without fuzz. The flesh is deep yellow, fine grained with a very delicious flavor. Freestone. Late August.

Hiley Fruit large size with a delightful red cheek; flesh is white, tender and exceedingly juicy. A good shipper for an early peach, and brings good prices. Tree is hardy in wood and bud; a strong grower and good producer. Freestone. August 30th.

Niagara A new variety of unusual large size and attractive appearance. Fruit a beautiful golden yellow, blushed with brilliant red; flesh yellow, tender, rich and juicy, ripening clear to the pit. Resembles the Crawford but larger, better quality,

and a better bearer. It has been thoroughly tested by extensive orchard planting in Western New York where it originated, and found to be an excellent commercial variety. The tree is a good, strong, vigorous bearer and very hardy; bears young and regular. Freestone. September 1st.

Rochester Is in a class by itself because it is the only good sized yellow freestone peach of fine quality ready for market in the middle of August in the Northern states. The fruit is large, yellow with a most attractive red blush; juicy and delicious and keeps well; an excellent shipper.

Salway Fruit large, handsome yellow mottled with red. Flesh yellow, firm, juicy and rich; particularly fine for canning and preserving. Comes on the market very late and is valuable where a succession is desired. Good keeper and shipper. Tree hardy, healthy and good bearer. Freestone. October 10th.

Smock (Beer's Smock). Fruit medium to large size; bright orange yellow beautifully blushed with deep red; the flesh is firm, tender, juicy and of fine flavor. One of the old standard varieties that is still very valuable for home use and for market. Tree a strong grower and productive. Freestone. September 30th.

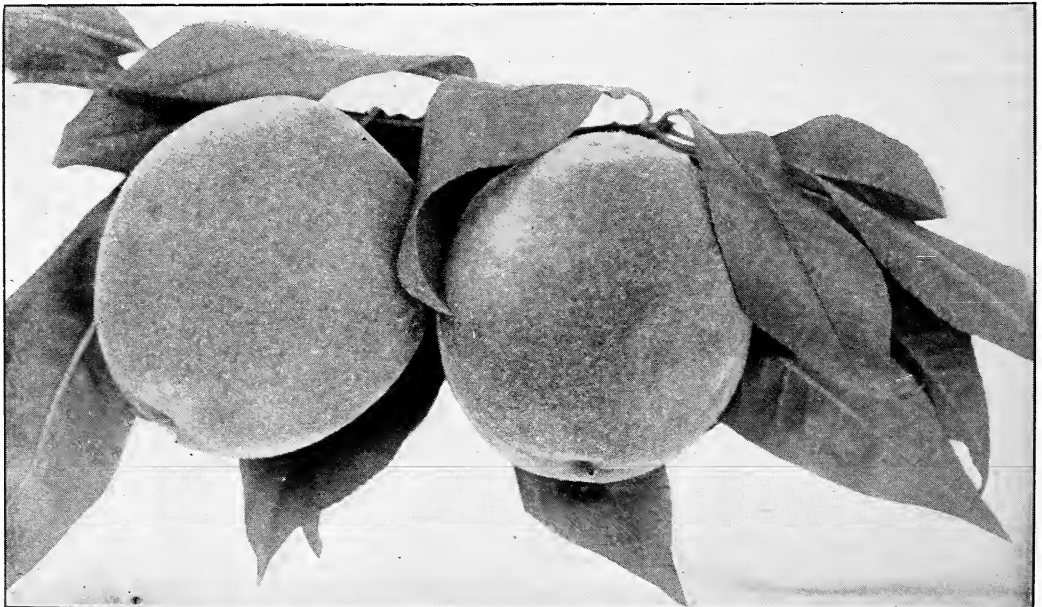

William J. Reilly,

Palmyra, Pa.

Dear Sir:—I received my order of trees in perfectly good condition. Am well pleased with your strong rooted, healthy trees, and your honest dealings which give perfect satisfaction. The peach trees which I received from your nursery two years ago are bearing and True to Name. We headed them back severely after planting, and they have made a growth of 8 feet high and 9 feet wide. This is proof of the High Quality of Stock you grow. Several of my neighbors after comparing their trees with mine are sending you their orders, and I will continue to recommend your Stock and Honest Dealings.

Very truly yours,

B. L. HEAGY.

LATE CRAWFORD PEACH

Standard Pears

All Budded Trees on Whole Roots of Imported French Pear Seedlings

THE cultivation of this noble fruit is extending as its value is appreciated. The range of varieties is such that, like apples, they can be had in good eating condition from August until early spring. The pear succeeds on most soils, but does best on a rather heavy loam or clay. Budded on its own stock it makes a standard tree, and on French or Anger's Quince, a dwarf, the former being the best adapted to large, permanent orchards, the latter to yards and gardens.

In 1930 the importation of French seedling stock will be prohibited by government embargo. This means that the stock heretofore imported will have to be grown in the United States. Now is the time to obtain these choice imported stocks for the development of superior fruit trees. We have a fine supply and urge that you cover your future requirements before the embargo takes effect.

SUMMER VARIETIES

Clapp's Favorite Very large size; yellow, splashed with crimson and russet. The flesh is white, fine grained, juicy, melting and of excellent quality. The tree is erect, hardy, healthy, vigorous and very productive. Blooms late and is not liable to be caught by late spring frosts. Ripens ten days before Bartlett.

AUTUMN VARIETIES

Anjou (Beurre d' Anjou). The best commercial pear of its season. Large, handsome greenish yellow, blushed dull red and russet; flesh white, fine grained, buttery, melting and a rich, high flavor. One of the best shippers, and keeps well. The tree is an upright grower, very vigorous, hardy, long lived and productive. Ripens in October; keeps until mid-winter.

Bartlett One of the oldest varieties, and still the most popular, both for commercial orchards and home garden. Fruit large size, clear bright yellow, with blush on the sunny side, buttery, melting and rich flavor. The one great pear for canning, shipping and home use. The tree is erect, vigorous, hardy and a late bloomer. Comes into bearing third year after planting. Season early September.

Beurre Bosc Extra large size; deep russet yellow; high flavored and delicious. Ripens in October and can be marketed at that time.

Duchess (Angouleme). Fruit very large, dull greenish yellow and russet; flesh white, rich and of good quality. A most dependable cropper and profitable market variety. Bears very young, usually the second year after planting. Valuable as both standard and dwarf. October and November.

CLAPP'S FAVORITE

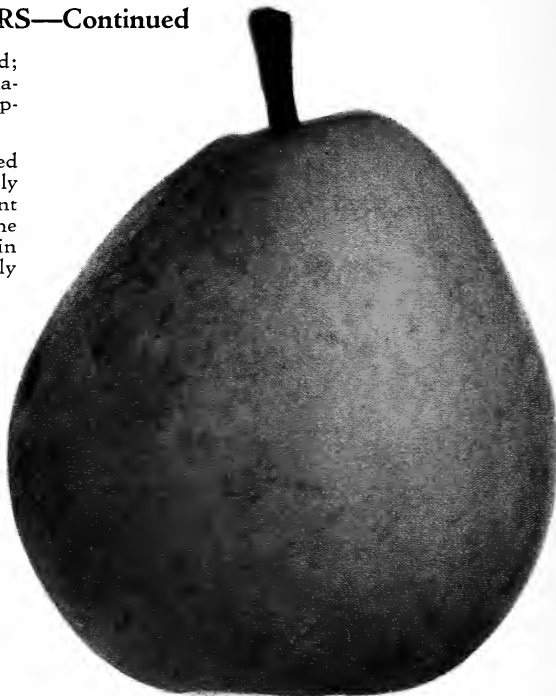

PEARS—Continued

Flemish Beauty Large, yellow, brownish red; flesh tender, juicy and high flavored. Tree very hardy, vigorous and fruitful. September and October.

Kieffer Large size; yellow, with brilliant red cheek. Beautiful in appearance but only fair in quality; flesh is juicy and coarse, but excellent for canning. Kieffer should be picked about the time the leaves begin to fall, and allowed to ripen in a cool dark place. The tree is an exceptionally strong grower, and a young and annual bearer.

Seckel The richest and highest flavored pear grown. Medium to small size; golden yellow, heavily russeted. The flesh is very fine grained, white, sweet, melting and juicy. It is productive to a fault and should be thinned in early summer. Blooms late. Bears about the fourth year. October.

Sheldon A large, round, russet and red pear of very rich, fine quality, melting and delicious. Tree vigorous, bears well. October.

SHELDON

Apricots

BEAUTIFUL and delicious fruit. In quality and appearance is between plum and peach, combining qualities of both. Ripening early, together with its delightful flavor, makes it one of the most valuable fruits. Tree hardy as the peach. Requires about the same cultivation as the peach or plum. It ships well and commands a good price in any market. For drying and canning, it has no superior. The Russian varieties are quite distinct from the other European sorts; much

hardier, earlier bearers and productive.

Largest Size, 1 year, Height 3 to 4 ft., Caliper $\frac{3}{8}$ and up, XXX, Each 85c, Ten \$7.00, Hundred \$50.00.

Medium Size, 1 year, Height 2 to 3 ft., Caliper $\frac{1}{2}$ to $\frac{3}{8}$, XX, Each 75c, Ten \$6.00, Hundred \$40.00.

RATES: 1 to 5 of a kind at each rate; 5 to 50 at 10 rate; 50 and over at 100 rate.

10% Discount on all Cash Orders mailed before April 5th.

ENGLISH VARIETIES

Harris A hardy English sort, that is doing well in this state. Medium size; oblong orange; good quality; very early. The best variety for Eastern culture.

Moorpark One of the largest. Yellow with red cheek, firm, juicy and very productive. An old and dependable variety. August.

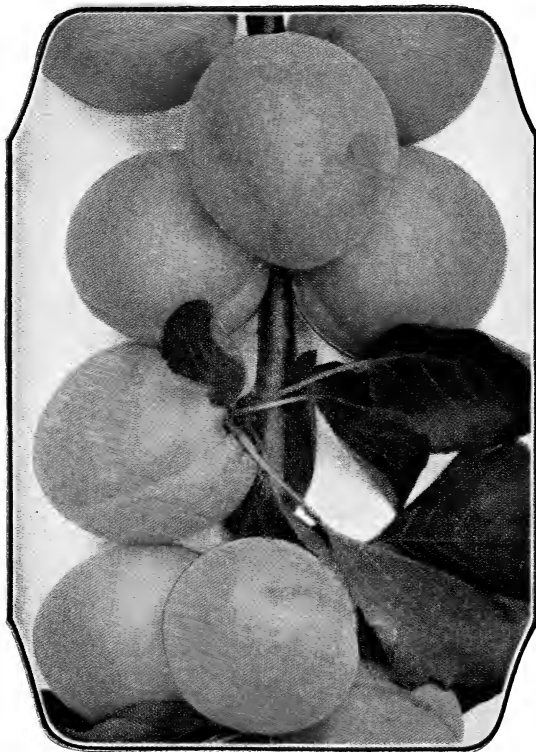

RUSSIAN VARIETIES

Alexander Fruit yellow, flecked with red. Prolific. July.

Alexis—Yellow with red cheek, slightly acid but good. July.

Budd—Fruit white with red cheek. An immense bearer. Best late variety. August.

Gibb—Medium, yellow, sub-acid. The best early variety. Last of June.

MOORPARK APRICOTS

Plums

All Budded on Whole Roots of Imported French Myrobolan Plum Seedlings

THE plum, like the pear and other fine fruits, attains its greatest perfection on our heavy soil, but will succeed on almost any soil that is rich. The plum is entirely free from disease. The curculio, a small dark brown beetle, often stings the fruit, causing it to drop off; by observing the following directions you will get a good crop of fine fruit. As soon as the blossoms have fallen, give the tree a sudden jar by striking a smart blow with a hammer on the stub of a limb sawed off for that purpose; this should be done in the morning while the dew is on. There are so many careless or indifferent growers who do not take these precautions, that the man who does will not only have a good supply of the best fruit, but will have a monopoly of the market.

Abundance One of the most popular of all Japanese varieties. The fruit is large, showy and beautiful. It has a bright cherry-red color. The flesh is yellow, firm, juicy, sweet and very delicious. Its season is very early which adds greatly to its value. The tree is vigorous and exceedingly productive.

Bradshaw A very large and fine early plum, dark reddish purple, juicy and good. Trees erect, very hardy, and vigorous; very productive; valuable for market. The quality is excellent, and it is destined to become one of the most popular of all plums for canning.

Burbank This variety is like Abundance, except that it is deeper in color, and ripens ten to fourteen days later. It is one of the handsomest plums on the market. Fruit is large, reddish purple; flesh yellow, juicy and good. Tree is very hardy and vigorous. It will withstand the frost better than most varieties.

Fellemburg (Italian Prune). A fine late prune; oval, purple, flesh juicy and delicious; very free stone. Good commercial sort. September.

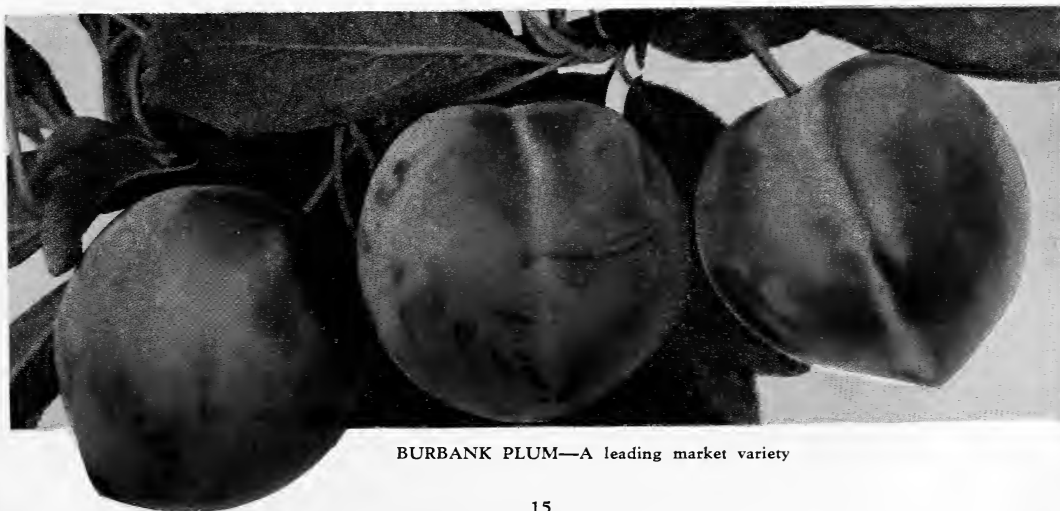

German Prune A large, long, oval variety; much esteemed for drying; color dark purple, of very agreeable flavor. September.

Imperial Gage Rather large, oval, greenish. Flesh juicy, rich and delicious. Parts from the stone. Tree a vigorous grower. Very productive. Middle of August.

Lombard Lombard is a great favorite. The tree adapts itself to any locality, it is extremely hardy, producing good crops where other varieties will not grow. It is a handsome reddish plum, flesh yellow, juicy and pleasant. An excellent variety.

Niagara It is a very early plum, and valuable for this reason. Red, large size, making an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit with great regularity. The tree is an upright grower, vigorous and healthy.

Red June Medium to large; deep vermilion red, very showy, flesh light lemon yellow, firm, delightful. The best early market sort. We recommend it for commercial orchard planting. Last of July.

BURBANK PLUM—A leading market variety

PLUMS—Continued

Reine Claude (Bavay's Green Gage). Very large, greenish yellow; juicy, excellent and of fine quality. Not liable to rot. Good bearer and valuable for commercial orchards. September.

York State Prune Large; blue, rich, juicy, fine. Best prune for market or garden. Tree is a vigorous grower and good bearer.

Shiro Medium size, yellow and very sweet. The best quality of any of the Japan plums. Recommend it highly for garden planting. September.

Shropshire Damson Large; amber color; juicy and sprightly; productive and not liable to rot. Good commercial sort. September.

Cherries

All Budded on Whole Roots of Imported French Mahaleb and Mazzard Stock

THE cherry, like the peach, does its very best on light soil, but will succeed in any soil that is dry. The sweet varieties are of rapid growth with large, glossy leaves, forming fine pyramid-shaped heads, and producing large crops of luscious, sweet fruit. Sour varieties generally produce acid fruit, and do not attain as large size; are hardier and better adapted for shipping to market.

A CHERRY ORCHARD WITH CURRANTS PLANTED BETWEEN THE ROWS

		Height	Caliper		Each	Ten	Hundred
Largest Size	2 Year	5 to 7 Ft.	3/4 & up	XXX	\$0.85	\$7.00	\$52.00

RATES: 1 to 5 of a kind at each rate; 5 to 50 at 10 rate; 50 and over at 100 rate.
10% Discount on all Cash Orders mailed before April 5th.

Early Richmond Best early variety for commercial planting, ripening ten days before Montmorency. Medium size, roundish;

color, bright light red. Flesh light colored, juicy and good quality; hangs well to the tree when ripe. Tree hardy, vigorous and very productive; long lived.

English Morello Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy for extremely cold latitudes. August.

Large Montmorency The largest and most productive of the sour varieties. The fruit hangs on well after dead ripe, and does not crack or rot in even hot, rainy weather. The flesh is tender, but firm, making it a good shipper. The tree is the largest and strongest grower of the sour varieties; especially hardy and productive; very hardy in bloom and very seldom injured by late spring frosts or severe winter weather.

May Duke Large; red, juicy and rich; an old, excellent variety; vigorous, productive. June.

Wragg Said to be an improved English Morello; similar in fruit, but larger. Tree very hardy, long lived and heavy bearer. August.

BLACK TARTARIAN CHERRIES

CHERRIES—Continued

Bing One of the largest black sweet cherries. Flesh juicy but firm. Tree a vigorous, upright grower, and productive. Ripens in July.

Black Tartarian This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Governor Wood Large, heart-shaped; light yellow and red; juicy, sweet and rich. Tree a strong grower, with more of a spreading head than most other varieties. Last of June.

Lambert One of the largest sweet cherries and one of the best in quality; dark red, turning almost jet black when ripe. Flesh firm, meaty, rich. Tree rugged, a strong grower, and a young and heavy bearer. Late July.

Napoleon (Royal Ann). The best quality and most profitable yellow sweet cherry. An attractive yellow with bright red cheek. Large

size, sweet, heart-shaped. Flesh very firm, juicy and delicious. Tree a vigorous, upright grower and bears heavy crops. Ripens late June.

Schmidt's Bigarreau Fruit large, often measuring an inch in diameter. Color dark purple to nearly black; flesh dark red, very firm; sweet, rich and of good quality. The tree is large, vigorous, spreading in habit and very productive. Ripens in July.

Windsor Originated in Canada and is one of the hardiest of the sweet sorts. Fruit large size; liver colored; flesh remarkably firm and of fine quality; exceedingly valuable as a late commercial variety. Tree an upright, vigorous and rapid grower. Ripens in July.

Yellow Spanish Fruit large, yellow and bright red; juicy, rich and high flavored. Tree moderately vigorous, but productive. Last of June.

Dwarf Pear and Apple Trees

THE dwarf varieties require less than one-fifth the space necessary for the standard varieties, and though the tree is dwarf, the fruit is the same size as standard, and is borne in large quantities. It is valuable both for the home garden and orchard planting for commercial purposes. It is a good filler for apple or standard pear orchards, because it is an early bearer and takes up but a small space. Trees should be planted ten feet apart.

DWARF PEARS

Bourgeat Tree a remarkably strong grower, surpassing all others, yielding immense crops; fruit of large size, round, rich, golden color; very tender when cooked; will keep until February in good condition.

Champion A prolific and constant bearer, fruit averaging larger than the Orange, more oval in shape, quality extra fine and a long keeper; bears very young. Ripens late.

Meech Fruit large, pear shaped, orange yellow; good quality.

Orange Fruit large, bright yellow, of excellent flavor. A vigorous grower, and an immense producer.

Rea's Mammoth A seedling of the Orange, averaging much larger, of the same form and color.

Currants

This is one of the fruits that no garden should be without. Will do well in most any soil, but responds generously to good soil and cultivation. Plant four feet apart each way; prune out old wood so that the remaining shoots will have room to grow; if bothered with currant worm, apply white hellebore to the leaves when damp.

PRICE OF ALL VARIETIES OF CURRANT BUSHES

	Each	Ten	Hundred
2 Year, No. 1 Strong Bushes	\$0.40	\$3.50	\$25.00

Cherry Berries very large, deep red; acid; bunches short; vigorous and productive. A reliable old market variety.

Fay's Prolific The leading market variety. Extra large stems and berries; uniform in size; color, bright red.

Perfection Beautiful, bright red, larger than Fay's, holding its size to end of bunch; a great bearer, superior to any other large sort.

White Grape Large, yellowish, white, sweet, excellent quality. Best white variety.

Red Cross One of the best currants on the market. Ripens in mid-season and produces an enormous quantity of fruit; flavor mild and pleasant.

Wilder Ripens the same time as Fay's Prolific, and hangs on the bush much longer; fully as prolific and is in every way as profitable. A popular variety for both table and market. It is one of the strongest growers and one of the most productive varieties on our list. Bunches and berries large, bright and attractive red even when dead ripe.

Gooseberries

Require the same cultivation and treatment as Currants.

PRICE OF ALL VARIETIES OF GOOSEBERRIES

	Each	Ten	Hundred
Strong, 2 Year Bushes	\$0.45	\$4.00	\$22.50

Downing Large; handsome, pale green, and of splendid quality for both cooking and table use; bush a vigorous grower and usually free from mildew.

Houghton's—Medium size, pale red, tender, sweet and good; very productive.

Josselyn—Fruit large size, smooth, prolific, and hardy, of best quality. A wonderful cropper and strong grower.

Rhubarb or Pie Plant

RHUBARB

Deserves to be ranked among the best early garden products. Continues long in use, and valuable for canning. Make ground rich and deep; plant four feet apart.

Myatt's Linnaeus—An early, tender plant, not tough or stringy; of mild, sub-acid flavor. It is the finest large red market variety.

Price of 2 year, No. 1 plants: 20c each; \$1.50 per 10; \$10.00 per 100.

Asparagus

Earliest and finest of spring vegetables. Prepare ground by deep culture, mixing well with rotted manure. Give thorough cultivation and keep clean. Do not cut for use until the plants have grown two seasons.

ASPARAGUS

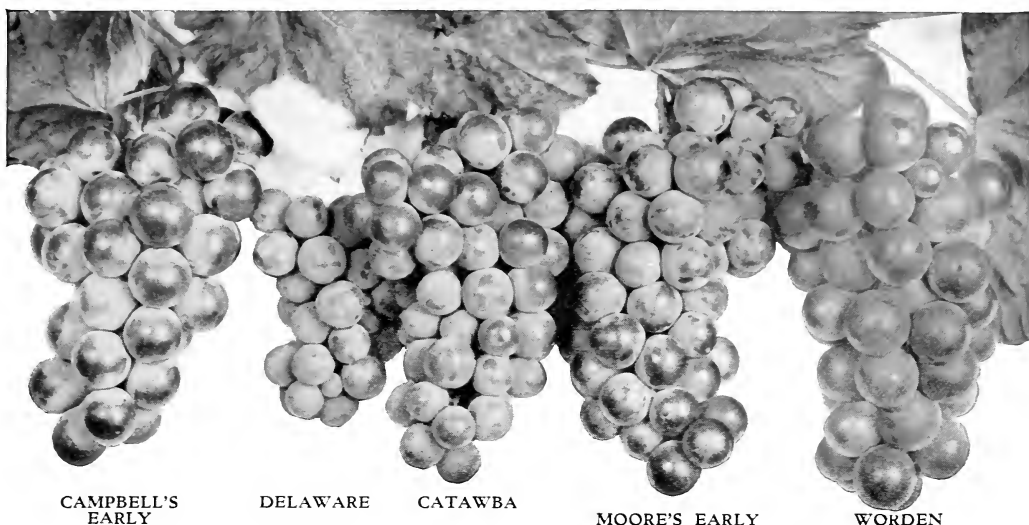

For home use set in rows 18 to 20 inches apart, with plants 10 to 12 inches apart in the rows.

BARR'S MAMMOTH—Medium early; tender, crisp; light green.

CONOVER'S COLOSSAL—This variety is much superior in size and quality to any other.

PALMETTO—Of Southern origin. Is a good yielder. Earlier than Conover's.

Price of 2 year, No. 1 plants: \$1.00 per 25; \$2.50 per 100; \$15.00 per 1000.

CAMPBELL'S
EARLY

DELAWARE

CATAWBA

MOORE'S EARLY

WORDEN

Grapes

REQUIRE little space, and when properly trained are an ornament to the garden or vineyard. The soil for the grape should be dry. When not naturally so, it should be thoroughly drained. For maximum crops it should be deeply worked and well manured, always bearing in mind that it is essential to have them in a warm, sunny exposure.

PRICE OF ALL VARIETIES OF GRAPES (Except as noted)

2 year, No. 1, Strong Vines	Each	Ten	Hundred
CONCORD	\$0.20	\$1.75	\$15.00
	.15	1.40	10.00

Brighton Red. Bunch medium to large, long, compact, shouldered; berries medium; skin thin; flesh tender, sweet; quality best. A free grower and very productive.

Campbell's Early A fine new grape, ripening very early. Clusters large and handsome. Berries large, black, light purple bloom. Vine vigorous.

Catawba Berries large, round; when fully ripe of a dark copper color, with sweet, rich, musky flavor. Requires a long season to arrive at full maturity.

Concord A large, handsome, early grape; succeeds wherever grapes are grown; one of the old standard market varieties. Color black.

Delaware Bunches small, compact; berries rather small, round; skin thin, light red; flesh very juicy, sweet, spicy and delicious.

Moore's Early Bunch large, berry large, round with heavy bloom.

Niagara Bunch medium to large; berry large; skin thin and tough; color pale yellow when fully ripe. Tender, sweet and good. Best of the white varieties. Ripens with the Concord.

Worden A splendid grape of the Concord type. Vine vigorous, hardy and productive. Earlier than Concord. Black.

NOTE
SPECIAL SHRUB COLLECTIONS
ON
PAGES 30, 31 AND 37

Mulberries

The mulberry is a very ornamental tree in garden or lawn. It is especially valuable in poultry yards, as the fruit drops when ripe through a long season.

PRICE OF MULBERRY TREES, 4 TO 5 FEET

	Each	Ten
Downing	\$0.85	\$8.00
New American	.85	8.00
Russian	.75	7.00

Downing Fruit very large, black, handsome, sweet, rich and excellent.

Russian Very hardy, vigorous grower; valuable for feeding silk worms. Fruit of small size.

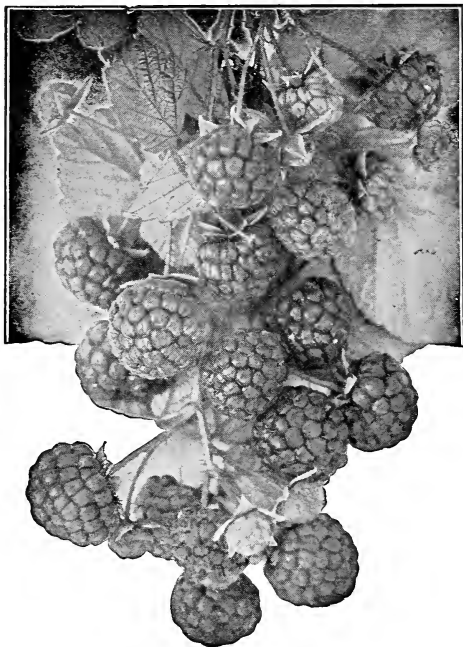

New American Tree a hardy and vigorous grower; the best quality for fruit; ripe from middle of June to middle of September.

RASPBERRIES

Will do well on most any soil that is moderately rich. Keep well cultivated and free from weeds. As soon as they are done bearing each year, cut out the old wood to give more vigor to the young canes. Plant in rows five feet apart, three feet in rows.

	Twenty-five	Hundred	Thousand
Price of Strong, Healthy Plants	\$1.25	\$4.00	\$30.00

PARCEL POST: Raspberries can be sent by prepaid parcel post for 2 cents per bush extra.

ST. REGIS EVERBEARING

Red Varieties

Columbian Fruit very large, purplish color, rather soft, rich, sprightly flavor, best for canning. Bush a very strong grower, and great producer.

Cuthbert A remarkably strong, hardy variety; medium to large, crimson. The most reliable late market variety.

St. Regis It succeeds on all soils, whether light and sandy or on heavy clay; the canes are of a stocky, strong growth, with a great abundance of dark green foliage. Plants set in spring will give a small crop the following, and two crops each year after. In size, quantity and quality the fruit is equal to any of the other raspberries.

SEE LIST OF
FRUITING AGE STOCK
ON
PAGE 7

Black Varieties

Black Diamond Fruit nearly as large as Kansas, firm and of high quality. It is said to be the sweetest of the black raspberries. Extremely popular in the berry sections of this state.

Cumberland A healthy, vigorous grower; fruit very large, firm, quality about the same as Gregg. Keeps and ships well. The most profitable market variety.

Eureka Very early, large, fine quality. Hardy and good market variety.

Gregg Very productive, large size. The standard late market variety.

Kansas Strong, vigorous grower, bearing immense crops; good quality, the standard mid-season variety.

Ohio One of the old standard varieties that still retains its favor; large size; good quality; extremely hardy.

Plum Farmer Berries thick-meated with a bloom similar to Gregg. It ripens very early, maturing its crop in a very short period makes it one of the most profitable of the early market varieties.

ELDORADO

STRAWBERRIES

Any good soil will grow strawberries; the better the soil the larger and better the crop. For field culture plant $3\frac{1}{2}$ feet apart, 15 to 18 inches in the row. For garden 15 to 18 inches each way.

Express: \$1.25 per 25; \$2.50 per 100; \$15.00 per 1000. **Mailed, Postpaid,** \$1.50 per 25; \$2.75 per 100.

Brandywine (Per.) Late. The strong, upright growing plants produce an abundance of very large berries on erect fruit stems. They are of good color and shape and possess a very fine, peculiar flavor. Begins to ripen in mid-season, and continues until blossoms are killed by the frost.

Corsican The standard market variety. A great yielder and producer. The best in its season. Color bright red.

Gibson (Per.) Gibson is fast becoming the leading commercial variety in the U. S. It grows and succeeds in every soil and climate.

Premier (Perfect). Early to late. Noted for its long fruiting season. Ripens with the early varieties and continues fruiting until the late varieties come in. It is adapted to all sections of the country. Fruit is large to very large and holds size well through its ripening season. Foliage is smooth, bright and clean. A good plant maker. We believe Premier is the most extensively planted variety of strawberries at this time.

Senator Dunlap (Per.) Season early to medium; popular market sort. Very productive; dark red all through.

William Belt (Per.) A handsome variety that is giving remarkable satisfaction as a large productive berry for market or home use.

Everbearing Varieties

Mastodon (Everbearing). Large, luscious, deep red berries, juicy and sweet, from June until heavy frost. There is no other everbearing strawberry that can compare with Mastodon. The rich fragrance and exquisite aroma of the fruits are outstanding. It is by far the heaviest yielder of the everbearing type. Mastodon is in a class by itself.

Americus Mastodon Productive Superb
These varieties will fruit from early July until cold weather.

Price, Express: 25 for \$2.00; 100 for \$4.50. **Mailed, Postpaid:** 25 for \$2.50; 100 for \$5.00.

All Strawberry Plants Will Be Shipped
the First Week in May

BLACKBERRIES

Plant on land moderately rich. Rows seven feet apart, three feet in row, cultivate shallow. Cut out the old wood each year.

PRICE OF 2 YEAR, STRONG PLANTS

\$1.50 per 25; \$4.50 per 100; \$35.00 per 1000. By Prepaid Parcel Post for 3 Cents Each Additional.

Blowers A new variety of Snyder type, it is very prolific; berry larger than Snyder. Canes very hardy.

Eldorado The vines are very vigorous and hardy. Berries large, jet black, borne in large clusters and ripen well together; they are very sweet, melting and pleasant, have no hard core, and will keep a week or more after picking.

Snyder Medium size, hardy and productive; no hard, sour core. The best blackberry for all purposes.

Ward This variety is a very vigorous grower and bears enormous quantities of fruit. Perhaps no other variety of recent introduction has attracted so much attention as this one. The berries are large, rich, sweet, tender and without a hard core.

Special Collections of Best Varieties

These Special Collections are made up of the best commercial varieties and will do well and produce the very best of fruit, in any section of the country where fruit can be grown. The trees and plants offered are all strictly First Class for the size mentioned. These collections are made up before shipping season begins and we can not make any changes.

BARBERRY HEDGING IS VERY ATTRACTIVE

Hedge Plants

There is no greater adornment than a fine hedge, and the necessary care is almost nothing. For marking lines it is as practical as a fence, besides being cheaper and much more sightly.

Privet, for best results, should be planted in a double row, rows 18 inches apart, with plants set 12 inches apart in the rows. They can also be set in a single row, 8 inches apart.

Privet, Amur River Resembles California in habits of growth, but is hardier and should be planted in sections where the California is liable to winter-kill.

PRICE:	10	100
18-24 in., well branched	\$1.50	\$12.00
2-3 ft., well branched	1.75	15.00

Privet, California Of all ornamental hedge plants this is the most popular and more of it is planted than all others combined. Its foliage is a rich dark green and is nearly evergreen, remaining on the plant until mid-winter. It is of free growth and succeeds under the most adverse conditions, such as under dense shade of trees, where other plants would not exist.

PRICE:	10	100	1000
18-24 in., well branched	\$0.85	\$4.50	\$40.00
2-3 ft., well branched	1.25	7.00	60.00

Barberry, Thunbergi Of spreading habit, growing extremely thick right from the base. The leaves are small, light green and toward fall assume rich, brilliant colors, the fruit or berries becoming scarlet. There is no shrub so generally planted or more practical for all purposes where a beautiful foliage effect is desired. It is dwarf growing, bushy and rounding in form, easily pruned to the desired shape or form for hedges or single specimens. For hedge, foundation screen and in front of porch, plant 18 inches apart.

	Each	10	100
15-18 in., well branched	\$0.30	\$2.50	\$20.00
18-24 in., well branched40	3.50	30.00

Wm. J. Reilly Nurseries,

Springfield, L. I.

Gentlemen: I received the rest of my order today and everything is in fine shape. My peach and cherry trees I got from you three years ago have fruit this year. and I am very happy about them.

Thanking you for your prompt service. I remain,
HERMANN GRAMLICH.

CALIFORNIA PRIVET CANNOT BE EXCELLED FOR HEDGING

Hardy Climbing Vines

All 2 Year, No. 1 Plants

WISTARIA

Ampelopsis Veitchi (Boston Ivy)—This is one of the most beautiful ivies and the latest acquisition. It is a rapid grower and clings tenaciously to brick or stone walls, requiring no artificial fastening or training. It is hardy and thrives almost everywhere. 60c each.

Aristolochia Siphon (Dutchman's Pipe)—Brownish flowers, resembling a miniature pipe; splendid for archways or verandas. \$1.25 each.

Chinese Wistaria—One of the most elegant and rapid growing of all climbing plants; attains an immense size, growing at the rate of 15 to 20 feet in a season. Has long, pendulous clusters of flowers in May, June and in autumn. Purple, white and blue. 65c each.

Hall's Japan Honeysuckle—Almost evergreen, hardy and of strong growth. The flowers are fragrant, of a pure white changing to yellow. 50c each.

Jackmanni Clematis—Flowers, when fully expanded, are from 4 to 6 inches in diameter; intense violet purple, with a rich velvety appearance. \$1.00 each.

Paniculata Clematis—Of very rapid growth, with handsome glossy foliage. The flowers are of medium size, fragrant, pure white. 50c each.

SEE LIST OF FRUITING AGE STOCK
ON PAGE 7.

Nut Trees

UNTIL recently little attention has been given to Nut fruits; this should not be so, as considerable profit may be derived from their cultivation. The growing of nut fruits is very simple in itself, requiring only ordinary labor and little expense. Many kinds make good shade trees in addition to the value of the wood and nuts.

We are very often asked as to whether the English Walnuts that we supply are hardy in the northern part of the United States, and in reply to this would state that there are several commercial English Walnut orchards in our own country here, and we recommend that English Walnuts are hardy and will live and bear fruit in any section that will grow peaches successfully.

American Black Walnut—The common American Black Walnut is a native tree of fast growth and large size. The timber is exceedingly valuable, and is even exported to foreign countries. Trees produce heavy crops of large, oily nuts, which are readily sold at a fair price. 4-5 ft., 80c each.

Chestnut, American Sweet—This is the well known native variety, with medium size sweet nuts. It is the only variety of chestnuts that can rightfully be called sweet. It seldom fails to produce a good crop of nuts each year, and there is always a ready market at a good price. 4-5 ft., \$1.50 each.

English or Madeira Walnut—The largest and most delicious of all the walnut group; produces large crops of thin-shelled, meaty and desirable nuts, which are always in good demand at high price. Makes nice ornamental trees for the lawn. 3 to 4 ft., \$1.25 each.

Butternut—Produces large, long nuts, with a rich, sweet, oily kernel; very nutritious. 4-5 ft., \$1.00 each.

ENGLISH WALNUT

Roses

OUR roses are all hardy, two year, field grown stock, sure to bloom the first year; in fact most of them have bloomed in the nursery before sending them out. Plant 3 to 4 inches deeper than they stood in the nursery; pack the soil well around the roots; trim the shoots back to 6 or 8 inches, and shade from the sun until they start growing; a good way is to cover with newspaper weighted down to prevent blowing off. When the planting is finished a good soaking with water should be applied; then mulch with coarse manure.

Hybrid Tea or Everblooming Roses

This is a class of recent creation, embodying the delicate shades and peculiar fragrance possessed by the Tea Roses combined with the vigor and more pronounced pink and crimson shades of color previously confined to the Hybrid Perpetual class. In our opinion the Hybrid Teas will supersede all others because of their superior constitution and marvelously free flowering qualities. In a sentence it may be said they combine all the better traits of the two classes from which they sprang, altogether a great advantage. Almost all are highly perfumed, an attribute absolutely essential to a perfect rose. They are everbloomers and hardy in all but the most rigorous climate.

PRICE OF ALL VARIETIES OF ROSE BUSHES (Except as noted).

	Each	Ten
Strong Bushes, 2 year, No. 1.....	\$.65	\$6.00

Columbia—A beautiful pink, shading darker with maturity. The flowers are large, fully double. Fragrant, and borne until late fall. Strong grower.

Crusader—A rose of recent introduction. Color a rich, velvety crimson. Well formed and of good lasting quality. Borne on long, stout stems.

General McArthur—One of the best red roses of this class. Color crimson scarlet. The most beautiful shade of any garden or forcing rose offered. Retains its brilliancy when expanded into flowers of superb form.

Gruss an Teplitz—Bright crimson; fiery-red center; cup-shaped; semi-double. Flowers in clusters. So free in bloom as to present a blaze of scarlet. Should be in every garden.

Kaiserin Augusta Victoria—Pure white. Splendid, large buds and superb, full, double blooms, making the choicest cut flowers. A most sturdy grower, blooming from early spring until late frosts.

Killarney, Pink—Long, pointed buds, opening into large, loose blooms of lovely flesh-pink, shaded white, suffused with pink. Fragrant. Plant vigorous and free.

Killarney Brilliant—A very much improved Killarney, with more brilliant color, equal perfume and better blooming habit. An indispensable rose.

Killarney, White—A sport from Killarney. Grand in every way. Resembles the Pink Killarney in habits and freedom of bloom. Planted in the garden it comes with a delicate pink tinge that if anything adds to its beauty. A great acquisition and a really wonderful rose.

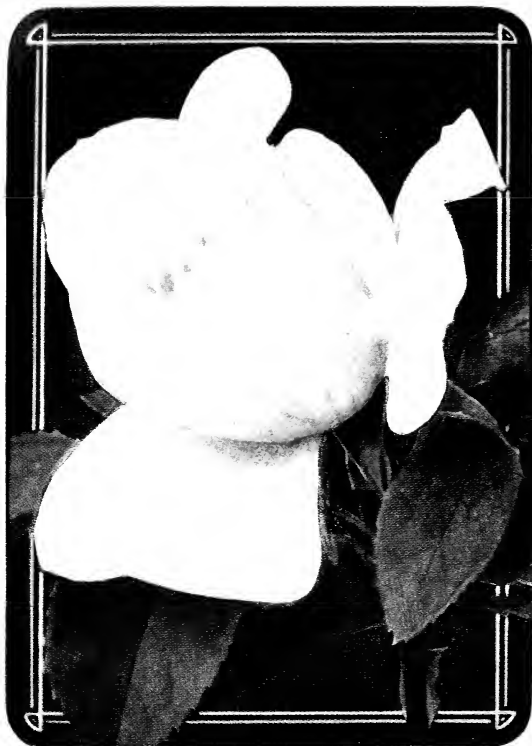

Lady Ashtown—Deep carmine-pink, shading to yellow at base of petals, with a silvery-pink reflex. An extra good bloomer.

Los Angeles—One of the best garden roses. Beautiful flame-pink, toned coral, shaded gold at base of petals, showing a wonderful and delightful variation in these shades, from the bud to the open bloom. The plant is of vigorous growth and blooms freely. Very fragrant. A very desirable rose. 75c each.

Mme. Butterfly—Color a blending of pink to apricot and gold. Profuse bloomer throughout the season. A strong grower. One of the best newer varieties.

Sunburst—Very select. Lovely bronze yellow, paling slightly at the edge of petals. A very full bloom when open and of good lasting qualities. 75c each.

TRITOMA—A Showy Perennial

FOXGLOVE

Hybrid Perpetual Roses

Anna de Diesbach—Bright carmine red. Large and full. Very attractive. Vigorous grower. Hardy everywhere in the United States.

Frau Karl Druschki—This grand white rose has become renowned as the very highest type of its class and the best snow-white rose ever introduced. Extraordinary strong grower. Flowers immense in size and produced with great freedom. A true snow-white, the standard by which all other whites are judged.

General Jacqueminot—Crimson-scarlet; large and full. Very fragrant. An excellent rose.

Magna Charta—An old favorite. Very large, full globular bloom of rosy pink, often tinted carmine, remaining on the plant a long time in good condition. A vigorous grower.

Marshall P. Wilder—Rich, glowing red. Large, full blooms produced freely, with a strong, penetrating fragrance. Plant a vigorous grower. One of the best.

Mrs. John Laing—Clear, bright, shining pink; full and double. Perfectly hardy, with immense flowers.

Mrs. R. G. Sharman-Crawford—Large, perfectly formed, deep rose pink blossoms. Outer petals delicately flushed with pale flesh. A strong grower, producing an abundance of blooms.

Paul Neyron—Deep rose, flowers of immense size. Claimed to be the largest rose grown.

Persian Yellow—An old favorite. Very early. Color deep golden yellow.

Prince Camille de Rohan—Universally known as "The Black Rose," owing to its very deep, velvety crimson color, passing to intense maroon, and shaded black. Large, handsome and fragrant blooms.

Soleil d'Or—A rich gold, varying to orange and red. Strong grower.

Ulrich Brunner—Large flowers of a bright clear red, borne on long stems. Plant a vigorous grower. One of the best.

Climbers and Ramblers

Baby Rambler—A dwarf (bush). Just the thing for beds and borders and for edging walks. Bound to take the place of geraniums and other plants. Crimson and white.

Blue Rambler—A German novelty of recent introduction, the nearest approach to a blue rose.

Climbing American Beauty—This new climbing form of the famous pink rose, so long the favorite for cutting, is as lovely and fragrant and deep pink as the bush form. The hardy climbing wood with which it is crossed gives healthy, perfect foliage and a strong, climbing habit of growth.

Crimson Rambler—Bright crimson flowers, produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches, also makes a fine hedge.

Dorothy Perkins—A most delightful deep pink; the flowers are borne in large clusters of small double blooms and are very sweetly scented. The strongest and most satisfactory of the rambler or climbing class.

Flower of Fairfield—A counterpart of Crimson Rambler in every respect, except that it shows ever-blooming tendencies, many new growths being terminated with large clusters of flowers.

Paul's Scarlet Climber—The flowers, of a vivid scarlet, are of good size, semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes, the plants being literally covered from top to bottom with bloom. It is of strong climbing habit and perfectly hardy. This is one of the most popular climbing roses. See front cover.

Tausendschoen—The flowers upon first opening are of the most delicate shade of pink ever seen in a rose, the bright clusters of blossoms almost covering the handsome pale green foliage. A vigorous climber with few thorns.

BABY RAMBLER ROSE

White Rambler—Grows vigorously in clusters of pure white flowers.

Yellow Rambler—A hardy climber. Double golden-yellow flowers in large clusters.

SPIREA AND HYDRANGEAS MAKE AN IDEAL PORCH PLANTING

Hardy Flowering Shrubs

	Each	10
Strong, 2 Year, 2-3 Feet.....	\$3.00	\$3.50

Except as Noted.

Butterfly Bush—Seems to attract butterflies in large numbers. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is often ten inches long. It blossoms from early summer until frost; fine for cutting.

Calycanthus (Sweet Scented Shrub)—Particularly desirable on account of the fragrance of the wood. Flowers are of a rare chocolate color, with an agreeable odor.

Deutzia Crenata—A hardy, tall-growing shrub with double pink flowers; blossoms in June. The deutzia is among the most attractive of our flowering shrubs.

Deutzia, Pride of Rochester—Very early, large double white flowers, profuse bloomer and vigorous grower. A week earlier than Crenata.

Double Pink Almond—Produces very double, rose-colored flowers in great profusion in the spring. One of the most charming early flowering shrubs. 50c each.

Forsythia (Golden Bell)—This is a pretty shrub of medium size. The flowers are drooping, yellow, and appear very early in spring before the leaves. Among the very best early flowering shrubs.

Golden Elder—One of the best of the colored shrubs, foliage a rich golden yellow. One of these plants in a bed, row, border, or on the lawn is a very conspicuous feature.

Japanese Barberry—Valuable for low hedging or grouping; as a hedge it will grow so dense and strong that nothing can get through it. The plant is dwarf, with spreading or drooping branches; foliage in the spring is a bright green, changing to brilliant crimson in the autumn; bears clusters of scarlet fruit, conspicuous from October to January.

New Red-Leaved Japanese Barberry—The foliage is of a rich, lustrous, bronzy-red, becoming more brilliant as the season advances, turning to shades of red, orange and scarlet in the fall. Needs full exposure to the sun to bring out the brilliant coloring. 70c each.

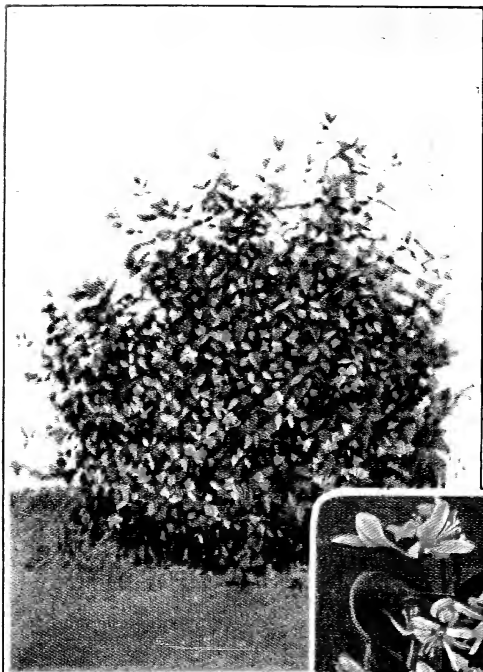

Washington, D. C.,
March, 31, 1928.

The Wm. J. Reilly Nurseries,
Dansville, N. Y.

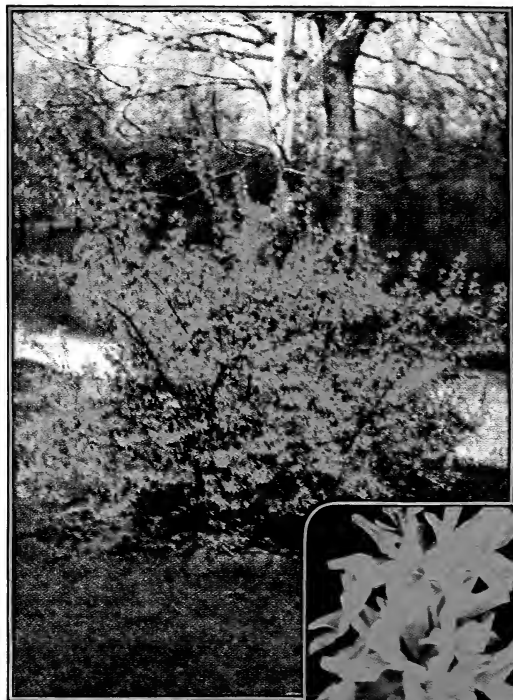

Gentlemen:

Inclosed is the order I am having sent to my father, who thinks Reilly trees the best he has ever planted. He considers them far superior to those of ——. The same age trees from Reilly planted two years later than some from — are ahead. He says it's the root system of the Reilly trees. "They have the finest roots of any trees I ever saw. Don't send me anything but Reilly trees to plant," he said. I wish to thank you for the extra shrub and tree offered in your Goodwill Offer. I also wish to state that father is very enthusiastic over The Farm Journal. "The best farm paper I ever took," he says. In fact, he seems to think everything coming from or recommended by Reilly to be first-class.

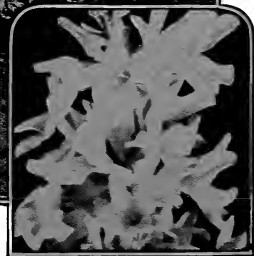

Yours sincerely,
M. M. MACKEY.

SPIREA VAN HOUTTEI

FLOWERING ALMOND

HARDY FLOWERING SHRUBS—Continued

Althea or Rose of Sharon—Blooms late in August and September, at a time when so few other shrubs are in blossom; flowers large and brilliant color; makes an elegant flowering hedge. Red, purple, white and variegated leaved.

Coralberry—*Symphoricarpos Vulgaris* (Indian Currant)—Vigorous, quick growing shrub similar to snowberry, except fruit is red. Rose colored flowers in June and July.

Hardy Hydrangea (*Paniculata Grandiflora*)—It is hardy, enduring the severest winters out doors without protection. It is easily transplanted, not one in a thousand dying; it never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers, many of them as large as the head of a full grown child. When the specimens first open they are greenish white, later they turn to a pure white, and still later to a delicate pink. The hydrangea should be cut back at least one-half of each season's growth in order to get the largest specimens. 50c each.

Honeysuckle Tartarian — Bush form; they have bright and pretty fragrant flowers, followed by showy berries that last through the fall. Make desirable and attractive hedges, borders or single specimens. Colors, white, pink and red.

Hydrangea arborescens grandiflora alba — Also called "Snowball Hydrangea" and "Hills of Snow." The blooms are of the very largest size, of pure snow-white color. One of its most valuable characteristics is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early June through August, renders it doubly valuable to every owner of a garden; perfectly hardy.

Japan Quince—Very early in the spring this fine old shrub is completely covered with dazzling scarlet flowers, followed by small quince-shaped fruit which is quite fragrant. Grows bushy and dense with protecting thorns. 70c each.

Kerria Japonica—A medium dwarf shrub with beautiful globe-shaped flowers of bright orange. July.

Lilac—A well known shrub that should be in every collection. Purple and white.

Philadelphus (*Virginale*)—A new variety of exceptional merit. Vigorous and tall, with flowers in dense clusters. Large, double, pure white flowers.

Snowball, Common—A well known favorite shrub of large size; bears clusters of pure white flowers in May and June. 70c each.

Snowberry—Very ornamental, hardy shrub. Small, pink flowers followed by large, waxy white berries, which remain during winter.

Spiraea, Anthony Waterer—A beautiful dwarf shrub that throughout the season continuously yields an abundance of rich crimson flowers.

Spiraea Billardi — A hardy, free growing shrub. During July every branch and twig is tipped with a spike of beautiful blood-red flowers 4 to 6 inches in length.

Spiraea Thunbergi—Forms a dense, fluffy bush 3 to 5 feet high; the feathery foliage, which is a peculiar but pleasing shade of yellowish green, changes in autumn to bright red and orange.

Spiraea Van Houttei—The grandest of all spiraeas. It is a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom, the foliage hardly showing. Perfectly hardy and an early bloomer.

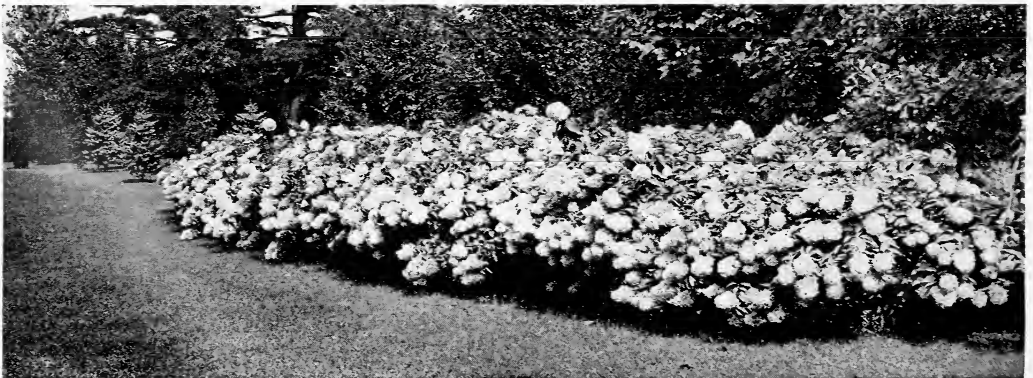

Syringa (Mock Orange)—Very hardy, vigorous grower with very fragrant, showy white flowers.

Thunberg's (*Thunbergi*) — A Japanese species of small size, with narrow, linear leaves and small white flowers.

Weigela Candida — Of vigorous habit and erect growth, a choice variety of pure white flowers, blooming in June, and to some extent all summer. Desirable for border, for grouping and make fine specimen plants for the lawn.

Weigela Eva Rathke—One of the most attractive and very distinct varieties; flowers deep carmine red. 70c each.

Weigela Rosea—An elegant hardy shrub with fine rose-colored flowers. Blossoms in July.

HYDRANGEA ARE VERY EFFECTIVE IN A MASSED PLANTING

Evergreen Trees

OUR evergreens are all carefully grown at good distances for symmetrical development, are root and top pruned into handsome, shapely specimens that will transplant successfully to new homes with ordinary care. Planting season for spring from April 10 to May 15, for fall from about August 15 to October 10, depending on season and locality. We have selected specimens in many varieties on which we would be glad to quote prices on receipt of list, stating kinds, sizes and numbers wanted. All evergreen trees will be carefully dug with ball of earth about the roots and tightly sewed in burlap, and will stand transportation and transplanting with little risk of loss. In planting it is not necessary to remove the burlap. Place tree in properly prepared hole, cut burlap in several places, firm earth tightly about ball of roots, water and mulch.

ARBOR VITAE (Thuya)

American (White Cedar)—A beautiful native tree commonly known as the White Cedar; especially valuable for screens and hedges. Grows rapidly and soon forms a beautiful hedge, for which purpose it is one of the best evergreens. One of the few varieties that may be successfully sheared. Fine for planting singly or in groups with other evergreens. Price, 2 to 3 ft., \$2.00 each; 10 for \$18.00. 3 to 4 ft., \$3.00 each; 10 for \$25.00. 4 to 5 ft., \$4.00 each.

Compacta—A handsome dwarf; dense, perfect form; a charming shade of green. Price, 12 to 15 in., \$1.50 each.

Ellwangeriana—A low, broad pyramid with slender branches; foliage intermediate in texture. Price, 12 to 15 in., \$1.50 each.

Globe Arbor Vitae (Globosa)—Light green foliage of a grayish cast. A neat globular outline adapts this Arbor Vitae for formal plantings, tub and window box use, as well as in the foreground of evergreen groups. Price, 12 to 15 in., \$1.75 each. 15 to 18 in., \$2.25 each.

Geo. Peabody (Golden Arbor Vitae)—A moderate grower. Foliage golden-yellow, and retained well throughout the year. Very good for producing color contrasting effects. Price, 18 to 24 in., \$3.00 each.

Pyramidalis—Most compact and erect of the entire species. Symmetrical, columnar, outlined with dark green foliage. So arranged as to give a crested effect to the tips of the branches. Price, 2 to 2½ ft., \$3.00 each.

Siberian—A superb variety, somewhat similar to American, with heavier and fuller foliage and more compact habit. It holds its color during winter and bears trimming well; one of the hardiest. Price, 15 to 18 in., \$2.00 each.

FIR

Concolor (White Fir)—A picturesque Colorado species; long, leathery leaves, with glaucous tinge when young, becoming green with age. Branches arranged in horizontal whorls. A grand tree, making splendid specimens. Price, 18 to 24 in., \$5.00 each.

Douglassi—From the mountains of Colorado. A rapid grower, foliage somewhat resembles Hemlock, leaves light green above, glaucous below. Conical form, branches spreading, light and graceful. Price, 2 to 3 ft., \$3.50 each.

GLOBE ARBOR VITAE

SPRUCE

Colorado Blue—A rare, elegant tree with foliage of rich blue. Tree usually has a symmetrically shaped, narrow, pointing or rounding top; is hardy and quick growing. Price, 1 to 1½ ft., \$6.00.

Norway—A lofty, noble tree of open, pyramidal habit; exceedingly picturesque. Very popular and effective in evergreen groups and one of the best evergreens for hedges. Prices, 2 to 3 ft., \$2.00 each; 3 to 4 ft., \$3.00 each; 4 to 5 ft., \$4.50 each.

JUNIPER

Irish—Erect, slender and formal in habit; foliage sage green, very compact; making a splendid column, sometimes 15 to 20 feet high; much used in cemeteries. Price, 1 to 1½ ft., \$3.50 each.

Prostrata—Low, compact grower, making a dense mat over the surface of the ground. While it grows close to the ground, not over 6 to 8 inches in height, it may spread out to a distance of 12 feet or more. Price, 15 to 18 in. spread, \$3.00 each.

Sabina—Handsome moss green foliage; adapted to use as a filler in evergreen groups, or as a dwarf ground cover. Price, 15 to 18 in., \$3.50 each.

Virginiana (Red Cedar)—A well known American tree with fine dense foliage, varying in habit and color, the majority being formal and bluntly conical; others loose and irregular. Price, 2 to 2½ ft., \$3.00 each.

Austrian Pine—Tall, massive, with spreading limbs and long, stiff needles. Thrives along the coast, inland and under city conditions. Handsome for specimen or open group planting. Price, 2 to 3 ft., \$3.25 each.

NORWAY SPRUCE

EVERGREENS are adapted to many uses and, owing to their hardiness and year around color, should be planted extensively about the home. For foundation and porch plantings they are unsurpassed, as well as for specimen planting on the lawn. A properly placed evergreen windbreak will be a wonderful protection as well as extremely ornamental. Plant evergreens for all season beauty.

SHOWING TYPICAL SPECIMENS AND METHOD OF PACKING REILLY'S EVERGREENS

Ornamental and Shade Trees

BY all means plant shade trees. They are effective ornamentally from the time they are set out and soon their spreading growth will create a sheltered environment for the home that will be a pride and joy with the passing years. Contrast the heat and glare of downtown streets on a hot summer day with the inviting coolness and beauty of a well shaded residential avenue. Shade trees make the difference and the nominal outlay for planting is returned a hundredfold in greater property value and the enjoyment of pleasant surroundings.

Bechtel's Crab (Double Flowering)—The flowers are a beautiful pink; very sweet scented; two inches in diameter; blooms in May. Grows twenty to thirty feet tall. 3 to 4 ft., \$1.00 each.

Birch, American White—A large, vigorous, upright tree with smooth white bark and handsome foliage. Very effective when planted in front of evergreens, to afford strong contrast. 4 to 5 ft., \$1.50 each; 6 to 8 ft., \$2.00 each; 8 to 10 ft., \$2.50 each.

Birch, Cut-Leaf Weeping—An elegant, erect tree, with slender, drooping branches and fine cut leaves. A magnificent variety and worthy of a place on every lawn. 5 to 6 ft., \$2.50 each.

Catalpa Bungei (Umbrella Catalpa)—Grafted on stems 6 to 7 feet high, it makes an umbrella-shaped top without pruning. A very desirable ornamental for the lawn, or along the driveway. Perfectly hardy. \$2.00 each.

Elm, American—One of the very best shade trees for lawn, street or park; has wide, spreading head and graceful, drooping branches; attains very old age and large size. 7 to 9 ft., \$1.50 each; 9 to 10 ft., \$2.00 each.

NORWAY MAPLE

Maple, Norway—Supposed to be the best of the maples for street planting; grows to large size, with head usually round and perfect in form, with deep green foliage. 6 to 8 ft., \$2.00 each; 8 to 10 ft., \$3.00 each.

Silver Maple—Of excellent rapid growth and desirable where quick shade is wanted. 8 to 10 ft., \$1.25 each; 10 for \$10.00. 10 to 12 ft., \$2.00 each; 10 for \$18.00.

Sugar or Rock Maple—Straightest and most upright grower of all the maples; it is of grand proportions, often reaching the height of 100 feet; it roots deeply, allowing the grass to grow up close around the trunk and it does not upheave the sidewalk as badly as other varieties when used for street planting. 6 to 8 ft., \$2.50 each; 10 for \$22.50. 8 to 10 ft., \$3.00 each; 10 for \$27.50.

Liberty, N. Y.,
May 18, 1928.

The Wm. J. Reilly Nurseries,
Gentlemen:

Inclosed please find check in payment of Spruce trees. Everything in this year's order has come through in fine condition and as usual, when doing business with you, we were entirely satisfied. Please accept our thanks for the well-rooted, stocky plants, bushes and trees you sent us, every one a specimen in its makeup. Of forty some odd trees obtained from you last year only two died; a wonderful feat for this mountainous section. With best wishes for your continued success and assuring you of our appreciation of your most honorable treatment, we are,

Very sincerely yours,

Goerke (Health) Cottage.

Lawn

LOMBARDY AND CAROLINA POPLARS

Poplar, Carolina—The most rapid growing tree we have; especially desirable where quick returns are wanted; it is a vigorous, healthy, native tree, pyramidal in form, with large, glossy leaves, valuable for park or street planting.

Lombardy Poplar—Well known for its erect, rapid growth and spike-like form; not as good for shade as the Carolina.

Price, 8 to 10 ft., 75c each; 10 for \$6.00. 10 to 12 ft., \$1.00 each; 10 for \$7.50.

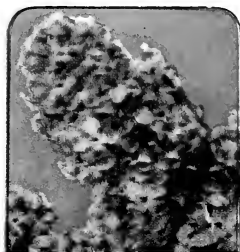

Tree Hydrangea—It forms a graceful low headed tree, does not attain a height of more than ten or twelve feet; blooms from August first until frost; fine for lawn decoration, either single or in masses. 3 ft., \$1.25 each.

The Old Fashioned Garden of Hardy Perennial Plants

GRANDMOTHER knew and loved them, tended them with a born care—with a realization of their beauty and splendor under favorable cultivating conditions. Her home garden was full of favorites that "came back" every spring and gave a wealth of bloom from early spring to late fall. The flowers she loved have shared in the spirit of improvement and we are offering greatly improved varieties of Hardy Perennials that graced the home garden of bygone years.

PHLOX

LARKSPUR

RUDBECKIA

Chrysanthemum—Hardy. They produce lavish display of bloom in October and November and are most welcome when other trees and plants have lost their leaves, as they supply flowers for the table until late November. Thrive anywhere. Can supply in red, rose, white and yellow. 20c each; 10 for \$1.80.

Delphinium or Larkspur—The hardy Larkspurs are easily among the finest of all our perennial plants. The prevailing colors are rich, clear shades of blue. The taller kinds furnish long spikes of bloom that are strikingly decorative and last a long time as cut flowers. Plants have a long season of bloom; can be prolonged by keeping the seed stalks cut out; supply plenty of water. The dark, handsome foliage is neat and attractive throughout the whole season. Plants are perfectly hardy. Bloom from June until frost. 20c each; 10 for \$1.80.

Digitalis or Foxglove—Stately and highly ornamental plants when well grown, with flower stems at least three feet in height. Fine for the mixed border or planted singly in half shady places near a walk or drive. The racemes of the flowers are often two feet in length, containing scores of prettily spotted, thimble-shaped flowers. Perfectly hardy. Colors: rose, white, purple, yellow. 20c each; 10 for \$1.80.

Gaillardia or Blanket Flower—Among the most attractive and effective of our hardy perennial plants. Thrive in almost any position or any soil. Bloom from June till autumn. Gorgeous flowers, 2 or 3 inches in diameter, dark red, brown in center with bands of crimson-orange and vermillion; borne on stems 18 to 24 inches long. When used for filling in front of shrubbery, Gaillardia adds a dash of color which is very effective. 20c each; 10 for \$1.80.

Hollyhocks (Double)—Colossal spikes of bloom, 5 to 8 feet high, produce bold and showy effects which cannot be secured with any other plant. Effective among shrubbery, in the herbaceous border and along fences and boundaries. Double white, pink, red, maroon and yellow. 20c each; 10 for \$1.80.

Rudbeckia or Golden Glow—Grows 5 to 7 feet and blooms from early summer until frost. Flowers golden yellow. 20c each; 10 for \$1.80.

Tritoma (Red Hot Poker)—Of perfect form, brilliant scarlet, the opened lower petals being trimmed with orange. Smooth, thick flower stalks a yard long with single fiery cone at the top. Tritomas are one of the great bedding plants. 30c each.

HARDY CHRYSANTHEMUMS

HARDY PERENNIAL PLANTS—Continued

GLADIOLI

The most attractive of all the summer flowering bulbs. Can be grown with very little care. Should be planted from the middle of April into May. Set bulbs 2 to 4 inches deep and 6 to 9 inches apart.

Price, 7c each; 50c per 10.

Augusta—White, faint lavender stripe.

America—Soft flesh pink.

Etendard—White with red center.

Francis King—Vermilion scarlet.

Herada—Pure mauve.

Niagara—Yellow.

DAHLIA

Price, 15c each; \$1.50 per doz.

Collarette—Red and white. John Walker—White.

Emily—Lavender.

Red Hussar—Red.

Flora Dora—Red cactus.

Snow Clad—White pompom.

Jack Rose—Dark crimson. Sylvia—Pink and white.

Variegated—Red and white.

PAEONIES

The rival of the rose in beauty and fragrance. The paeonies after once planted will pretty nearly take care of themselves and are one of the most popular of the hardy perennials. Plant in spring or fall. We have them in red, white and pink. 45c each; 10 for \$4.00.

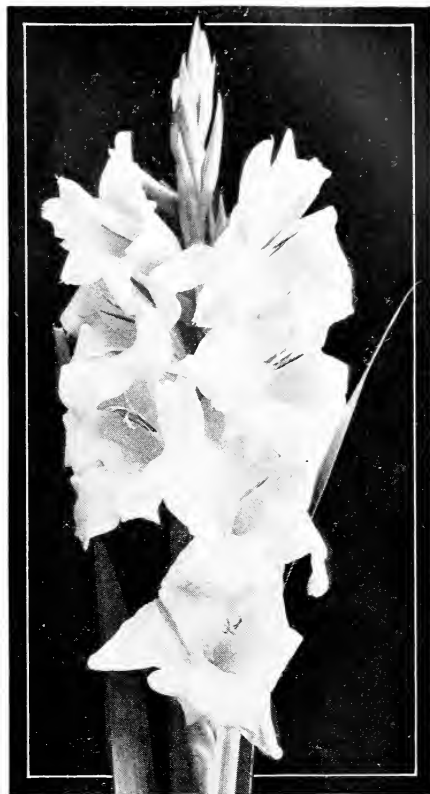

PAEONY

GERMAN IRIS

This beautiful flower should be considered indispensable in every collection for the wild garden, shrubbery border, margin of water, rock-work, etc. They are admirably adapted and should not be overlooked. They thrive in almost any soil or situation without care and scarcely any place can be found where they may not be used to advantage. They come into bloom in May and last several weeks. We offer these in the following varieties: Florentine (purple), Queen of May (rosy violet), Celeste (sky blue), Madam Chereau (lavender, white border), Flavescens (soft yellow). 20c each; 10 for \$1.80.

PHLOX (Hardy Perennial)

Among hardy perennial plants no class is of more importance than the phloxes, succeeding in almost any soil and position and flowering through a long season. While they will continue in good condition and flower freely for many years without attention, yet they respond quickly to and are improved by liberal cultivation. White, pink, red, lavender and salmon pink. 20c each; 10 for \$1.80.

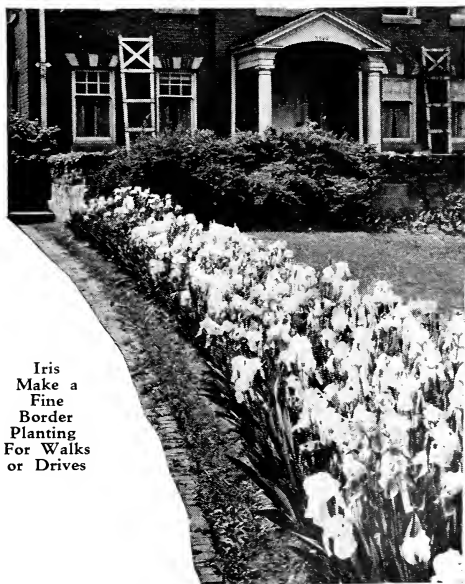

GLADIOLUS

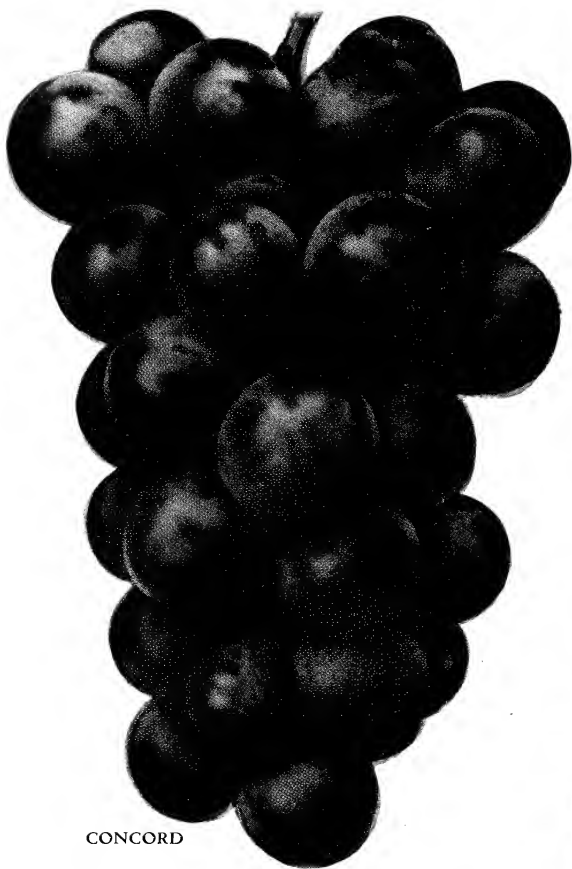

ORIENTAL POPPY

Scarlet shade. Large, showy. June.

Price, 25c each.
